Lonseal's Private Label Program

By Lisa Manriquez

Lonseal is pleased to announce the introduction of our Private Label Maintenance Program. We are committed to providing high end products that offer great performance through the life of the flooring.

LONPRIME SEAL & FINISH FOR RESILIENT SHEET VINYL

Designed to improve adhesion of floor finishes to the flooring. When applied, it develops good bonding to surfaces that even a strong duct tape, will not remove nor dull the finish.

LONCARE NEUTRAL pH FLOOR CLEANER FOR RESILIENT SHEET VINYL

Designed for use as a damp mop floor cleaner, this concentrated product is an effective cleaner on high gloss floor finishes. Used daily, this product will provide longer wear of floor and waxes.

LONFINISH ULTRA HIGH SPEED FINISH SUPERIOR UHS FORMULATION FOR RESILIENT SHEET VINYL

A high performance metal interlocked UHS finish with new SPT – Synergistic Polymer Technology, which incorporates the best properties of several polymers in a synergy that is

unsurpassed to create a uniquely formulated UHS finish. This special formula dries to a high gloss and offers excellent slip resistance.

LONSTRIP NON-AMMONIATED EXTRA HEAVY DUTY STRIPPER FOR RESILIENT SHEET VINYL

This is a "mop on, pick up, no-rinse" true no-rinse stripper. It will quickly penetrate, emulsify, and liquefy multiple layers of floor finish for complete removal. This product uses a concentrated solvent system that re-dissolves the floor finish, rather than breaking the polish loose from the floor.

Low-Emission Adhesive: GreenAir®

As Lonseal progresses towards the GreenVinyl® movement, we are pleased to reveal, that Lonseal's 555A has low emissions.

In today's environmentally conscious building industry, there are new demands on building material manufacturers to be more "green-friendly." Architects, builders, specifiers and facility administrators are now looking to find adhesive products with low emissions of volatile organic compounds (VOCs).

Carpet and Rug Institute's Green Label Plus Indoor Air Quality

Adhesive Testing Program has found Lonseal's 555A adhesive to be in compliance with their stringent criteria for low chemical emissions. This also provides credibility to the LEED programs criteria for acceptable VOC levels.

Lonseal's 555A adhesives Green Label ensures customers they are purchasing amongst the lowest emitting adhesives on the market.

"The label is assurance that the product is a low-emitting adhesive that helps ensure good indoor air quality." - CRI
